

Yukun Jiao

yukji739@liu.se yukunjiao.github.io

Education

Linköping University, Norrköping, Sweden
MSc in Computational Social Science

2024 – expected June 2026

Civil Aviation Flight University of China, Sichuan, China
BSc in Transportation

2018 – 2022

Research Interests

Causal inference; computational text analysis; social network analysis; political polarization; inequality and segregation.

Thesis

Mapping Symbolic Boundaries: The Semantic Construction and Change of Social Categories in r/incels
Master's thesis, Linköping University, in progress.

Research Internship

[The Complete Network of Sweden](#)

July 2025 – January 2026

Contributed to [Threadle](#), a high-performance software system for large-scale complex network data, through software testing, quality assurance, documentation, and development of the R wrapper package [threadleR](#).

Publications

Nordlund, C., & Jiao, Y. (2026). Threadle: A memory-efficient network storage and query engine for large, multilayer, and mixed-mode networks. *arXiv preprint arXiv:2603.04446*.
<https://arxiv.org/abs/2603.04446>

Service

Volunteer and project participant, SICSS-IAS 2025

Assisted with event activities; participated in a group project on elite networks in ancient China.

Volunteer, IC2S2 2025

Assisted with conference activities.

Skills

Technical: R, Python, L^AT_EX, Git, web scraping, reproducible research, Mathematica, MATLAB

Methods: Causal inference, social network analysis, computational text analysis, machine learning, agent-based modelling

Languages

Chinese (native); English (proficient)
