Yukun Jiao

yukji739@liu.se yukunjiao.github.io

Education

Linköping University, Norrköping, Sweden 2024 – 2026
MSc in Computational Social Science

Civil Aviation Flight University of China, Sichuan, China 2018 – 2022
BEng in Transportation

Research Interests

Computational text analysis; social network analysis; causal inference; political polarization; inequality and segregation.

Thesis

Mapping Symbolic Boundaries: The Semantic Construction and Change of Social Categories in r/incels
Master's thesis, Linköping University, 2026.

Research Internship

The Complete Network of Sweden July 2025 – January 2026
Contributed to Threadle, a high-performance software system for large-scale complex network data, through software testing, quality assurance, documentation, and development of the R wrapper package `threadleR`.

Publications

Nordlund, C., & Jiao, Y. (2026). Threadle: A memory-efficient network storage and query engine for large, multilayer, and mixed-mode networks. *arXiv preprint* arXiv:2603.04446.

Service

Volunteer and project participant, SICSS-IAS 2025
Assisted with event activities; participated in a group project on elite networks in ancient China.
Volunteer, IC2S2 2025
Assisted with conference activities.
Volunteer, SIRCSS Summer School in Computational Text Analysis 2026
Assisted with event activities.

Skills

Technical: R, Python, LaTeX, Git, web scraping, reproducible research, C++, Mathematica
Methods: Computational text analysis, social network analysis, causal inference, machine learning, agent-based modelling

Languages

Chinese (native); English (proficient)
